<b>Qëllimi studimor i lëndës</b>				<b>Përfitimet e studentit</b>			
<p>English for Academic Purposes is an integrated skills course, which means that students will develop their abilities in reading, writing, listening and speaking in an academic context. The textbook includes topics and texts that will be of interest to students from all disciplines. The B2 level according to the Common European Framework of Reference (CEFR) is aimed at undergraduate students who are independent users of English and that are also required to present work in English. The vocabulary focused on in the course has been selected for being of particular importance in academic writing, reading, lectures and seminars. The course consists of ten integrated skills units that develop academic language and critical thinking skills essential in academic contexts.</p>				<p>Students will benefit from the opportunity to practise language at an academic level. The textbook chosen provides students with academic skills and language needed for university study. Students will analyse characteristics of written and spoken academic texts, develop awareness of academic culture and learn to avoid plagiarism. From essay organisation, taking notes, group discussion to writing references and paraphrasing texts, the students are presented with a wealth of practice opportunities to enhance all academic skills.</p>
